"(b) The Congress further finds and declares that while substantial progress has been made toward achieving the foregoing purposes, especially with respect to the provision of essential public facilities, much remains to be accomplished, especially with respect to the provision of essential health, education, and other public services. The Congress recognizes that changes and evolving national purposes in the decade since 1965 affect not only the Appalachian region, but also its relationship to a nation now assigning higher priority to conservation and the quality of life, values long cherished within the region. Appalachia now has the opportunity, in accommodating future growth and development, to demonstrate local leadership and coordinated planning so that housing, public services, transportation and other community facilities will be provided in a way congenial to the traditions and beauty of the region and compatible with conservation values and an enhanced quality of life for the people of the region. The Congress recognizes also that fundamental changes are occurring in national energy requirements and production, which not only risk short-term dislocations but will undoubtedly result in major long-term effects in the region. It is essential that the opportunities for expanded energy production be used so as to maximize the social and economic benefits and minimize social and environmental costs to the region and its people. It is, therefore, also the purpose of this Act to provide a framework for coordinating Federal, State and local efforts toward (1) anticipating the effects of alternative energy policies and practices, (2) planning for accompanying growth and change so as to maximize the social and economic benefits and minimize social and environmental costs, and (3) implementing programs and projects carried out in the region by Federal, State, and local governmental agencies so as to better meet the special problems generated in the region by the Nation's energy needs and policies, including problems of transportation, housing, community facilities, and human services."

“ENERGY DEMONSTRATION PROJECTS AND PROGRAMS

42 USC 3194.

“SEC. 515. (a) Fundamental changes are occurring in national energy requirements and production which could result in short-term dislocation and result in major long-term effects on various regions of the country. Expanded energy production opportunities must maximize social and economic benefits while minimizing social and environmental costs to the regions experiencing increased energy development. In some regions, impacted by limited energy resources, severe problems disruptive of regional economies could result. The programs of the regional commissions provide an excellent framework for coordinating Federal, State, and local efforts toward (1) anticipating the effects of alternative energy policies and practices, (2) planning for accompanying growth and change so as to maximize social and economic benefits and minimize the social and environmental costs, and (3) implementing programs and projects carried out in the regions by Federal, State, or local government agencies so as to better meet the special problems generated in the regions by the Nation's energy needs and policies, including problems of transportation, housing, community facilities, and human services.

“(b) Each regional commission is authorized to carry out energy-related demonstration projects and programs within its regions including programs and projects addressing the social, economic, and environmental impact of energy development, requirements, and utilization. Grants shall be made only to those projects which are developed through regional planning designed to identify the effects of regional resource development, requirements, utilization, and impact. Each regional commission is authorized to carry out demonstration projects within its region in connection with the development and stimulation of indigenous art and crafts of the region.

“(c) Not to exceed \$5,000,000 of the funds apportioned to each regional commission under section 509 of this title shall be expended in any one fiscal year for the purpose of carrying out the energy-related provisions of this section, and not to exceed \$2,500,000 of such funds shall be expended in any one fiscal year for indigenous arts and crafts demonstrations.”

SEC. 205. Title V of such Act is further amended by adding the following new section at the end thereof:

"SEC. 516. Grants for such construction (including the acquisition of privately owned facilities not operated for profit or previously operated for profit where the acquisition of such facilities is the most cost effective means for providing increased health services, and initial equipment) shall be made after applications and plans relating to the program or project have been determined by the responsible Federal official to be compatible with the provisions and objectives of Federal laws which he administers that are not inconsistent with this title, and the regional commission has approved such program or project and determined that it will contribute to the development of the region, and shall not be incompatible with the applicable provisions of title VI of the Public Health Service Act (42 U.S.C. 291-291o), the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963 (77 Stat. 282), and other laws authorizing grants for the construction of health-related facilities, without regard to any provisions therein relating to appropriation authorization ceilings or to allotments among the States.
